SQUARE

Milestone is a highly refined architectural pre-cast, lightweight concrete ornamental stone, which rivals the beauty of natural stone while improving upon many of the shortcomings of natural stone. Milestone is made from white Portland cement, natural sands, and mineral coloring pigments to achieve the desired color and appearance while maintaining durable physical properties, which exceed some natural, cut building stones. Milestone is an excellent replacement for natural cut limestone, brownstone, coralstone, sandstone, bluestone, granite, slate, travertine and other natural stones. Our easy installation instructions make it simple for anyone to install these beautiful mantel surrounds.
