ROCKFACE

SANDSTONE

Rock-Lite is a line of durable lightweight urethane fireplace mantel surrounds that are reproduced from real stone providing near exact replicas of the actual materials. These surrounds are an excellent substitute for traditional stone. They are designed to fit all gas or electric fireboxes up to 38-1/2" high by 42" wide. Each Rock-lite mantel surround includes two legs, a breastplate and shelf. Simple adjustments can be made to accommodate smaller fireboxes. Installation is very simple and can be done in minutes with only glue and screws. Optional hearths, facing panels and trim are available.

FOR GAS & ELECTRIC
FIREPLACES ONLY
